- Managed Non-strategic platform exit and IT strategy execution for Finance and Compliance portfolios.
- Provided Architectural support to Compliance and financial portfolio applications
- Helped applications teams in evaluating products and technologies
- Supported more than 45 applications from Compliance portfolio

THE NIELSEN COMPANY, OLDSMAR, FL

2011-2013

SOFTWARE DEVELOPMENT AND SERVICE DELIVERY ARCHITECT

Collaborated with product leadership and client service executives to comprehend business vision and develop product/platform roadmaps. Teamed with various IT groups to develop proposals for new client RFPs, and participated in data gathering, architecture discussions to influence requirements and design through strategic analysis. Designed improvement plans for deficiencies in design/code to improve product quality. Proactively reduced software design activities through industry socialization. Implemented source change control policies for the entire online portfolio. Played key role in establishing and implementing software engineering best practices and standardized operations to improve quality of deliverables. Achieved zero quality issues or severity one issues in the past year.

- Developed capital/operational expenditure forecasts for IT infrastructure.
- Spearheaded work sessions with partner IT groups, resolving differences through creative discussions.
- Represented the panel team during bi-weekly program/project reviews with varying stakeholders.
- Designed innovative project plans for new architecture, software development projects and infrastructure upgrades.
- Provided daily oversight for onshore/offshore application developers to meet client deadlines.
- Identified and resolved risks within scope, quality, cost and schedules.
- Actively participated in vendor selection, managed work requests in Enterprise WRM, and tracked budgets/funding in EPM.
- Managed the RACI chart and reviewed architecture with the Enterprise Architecture Group.

KEY PROJECT INCLUDED:

- Developed a new panelist recruitment site for the consumer division, including architecture, finance and risk management.
- Managed a 10-month project allowing the organization to take product for MRC accreditation and create additional opportunities, and performed hardware refreshes for end-of-life servers.
- Spearheaded a project for the Italy business division to migrate a legacy site to a new content management platform, a key component in the capital growth project.
- Led an initiative to allow the business team to meet legal requirements in multiple countries for email subscribers, and implemented a project to help online, diverse, global business recruit panelists in who utilize Apple products.

NEW YORK LIFE INSURANCE, TAMPA, FL

2009-2011

PROJECT LEAD

Managed architecture and software development for critical applications. Implemented ETL processes and analytics for new products, devised a reporting solution for the annuity business line, reengineered the claim system through team collaboration, and designed/developed POC for a new claim system.

PACER INTERNATIONAL, COLUMBUS, OH

2008-2009

PROJECT LEAD/ANALYST

Managed architecture and software development for varying applications. Directed the implementation of customized application for single sign-on with SAP portal, assisted clients migrating an AS/400 based legacy application to an SAP based system, and analyzed business requirements to rebrand various legacy applications.

- Supported multiple business applications, identified the system impact of changes, and participated with business analysts and owners to design new processes and solutions for an SAP based system.

CASE CONSULTING, INC., VARIOUS LOCATIONS

1999-2008

SENIOR ARCHITECT

SANJAY KUMAR

Led the design and development of custom business applications for clients utilizing IBM, Microsoft and Java technologies. Engaged in all phases of solution development, and managed and coordinated deliverables within the technology delivery phases.

- Projects included: **CBay System** - development of online transcription portal and backend applications; **CP Ships** - various regulatory/EDI projects; **JLG Equipment** - performance improvement of the ordering application; **Carhartt** - online B2B order processing system development; **Timberland** - expansion of a 15-character item number key to 20 alphanumeric characters to accommodate inseams and facilitate simultaneous representation of two other characters of the item color and dimension; **Mazda** - implementation of a new EDI system with over 200 vendors to interface with new procure-to-pay processes; **AllenEdmonds.com** - building a B to C online store for the shoe company using IBM WebSphere Commerce Suit; and PharMerica - updating an application to handle year 2000 transition.

Volunteer Work Experience:

MEMBER OF DATA AND ANALYTICS INSIGHT TEAM (TECHNOLOGY MEMBER ADVISORY GROUP)– PMI.ORG (2019-2021)

VP OF PROGRAMS, PMI - TAMPA BAY CHAPTER (2013-2018)
